

.30 HERRETT

Developed by Steve Herrett and Bob Milek, the .30 Herrett is a reformed and shortened .30-30 Winchester case intended for use in the Thompson/Center Contender handgun.

Although all of the loads listed below exceed the recommended maximum overall length due to their spitzer shape, there should be no problem when used in a single shot firearm.

There is no SAAMI pressure limit for the .30 Herrett. Based on the recommendations of Thompson/Center, the maximum loads listed below do not exceed 42,000 P.S.I.
