

.17 MACH IV

This wildcat cartridge is simply the .221 Remington Fireball case necked down to .17 caliber.

The O'Brien Rifle Company is the originator of this very efficient cartridge, a little powder goes a long way.

Based upon the parent case and the type of rifles used, we used a pressure limit of 52,000 C.U.P., the same as the .17 Remington. As there are no doubt many versions of this cartridge in existence, caution is advised in approaching the listed maximum charge.

.17 MACH IV
